

DATABASE SERVICES

Comprehensive resource solutions for Oracle and SQL Server environments

With databases, sometimes you need a little help. A temporary replacement for an out-of-pocket team member. An extra set of hands to assist in a big project. A dedicated team to provide long-term support. Whether your needs are tactical or strategic, project or resource driven, Stonebridge offers flexible solutions that enable you to supplement your team with expert Oracle and SQL Server resources whenever and however you need them.

The Wise Choice for Database Staffing

Databases feed the enterprise applications that drive the business. And keeping critical data reliable, available, compliant, and secure is of the utmost importance to the viability of the enterprise.

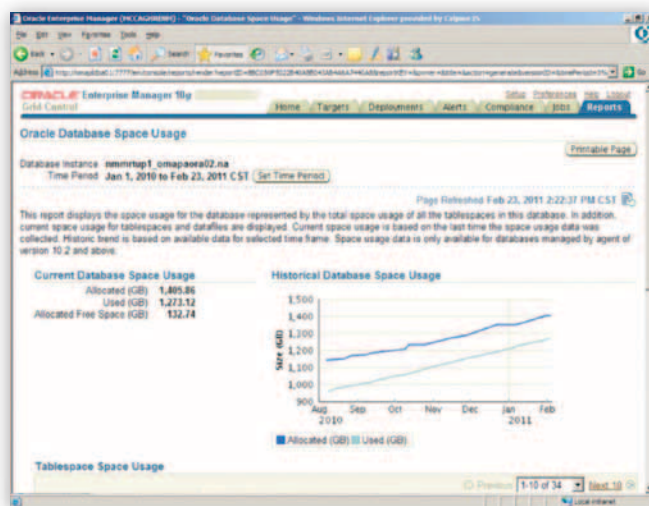

Downtime for production databases is expensive, often measured in tens of thousands of dollars per minute. Ensuring data availability and peak application performance requires specialized expertise and knowledge.

Moreover, IT managers are under increased pressure to find and retain senior DBAs in the face of tighter budget and the need to do more with less. Stonebridge can help.

Stonebridge offers affordable database resource solutions to meet your business' staffing needs. Our flexible solutions range from supplying qualified resources for one-time projects of defined scope to tailoring a strategic co-sourcing program for your company via Stonebridge's SmartSourceSM DBA managed services offering.

Stonebridge helps companies get the most from their database environments. We offer a complete range of database staffing and implementation services, including database development, database optimization/performance tuning, and database maintenance as well as upgrades and migrations.

Look to Stonebridge as your trusted partner for database resource solutions. Our consultants average 15 years' database administration experience, with world-class skills in managing and tuning Oracle and SQL Server running on platforms from Windows to Unix/Linux.

Oracle Enterprise Manager: Space usage over time

When it comes to database support, Stonebridge has the skilled professionals ready to step up to any challenge. And we deliver our database support services through a flexible, client-defined engagement model that conforms to your changing business requirements.
